

2026 TAX RATE ADOPTION

August 17, 2026

PROPERTY VALUES

We use a historical differential between the certified estimates provided by our appraisal districts and our final assessed values to estimate T2 values and the tax levy. To be conservative, we forecast future years using a declining growth rate.

The difference between projected assessed values and certified values does not impact operating revenue because of the school funding formula.

CHANGE IN PROPERTY VALUES

	"T2" ASSESSED VALUES	% INCREASE FROM PRIOR YEAR
2025	\$65,280,083,453	4.4%
2026 projected	\$66,302,665,150	1.6%
2026 certified	\$67,847,156,832	3.9%
2026 estimated final	\$66,488,458,773	1.9%

The values in the table above for 2026 are estimated "T2" assessed values, which are the values used to calculate state aid. Those values will not be known until certified by the Comptroller in the spring and therefore must be estimated based on values certified by the county appraisal districts and the historical change in values between July and January.

TAX RATE TERMINOLOGY

NO-NEW-REVENUE TAX RATE

The rate that would produce the **same taxes on existing property as last year**

This rate is intended to tell taxpayers the effect of the tax rate on them.

\$1.026275

RATE TO MAINTAIN REVENUE

The rate that would produce the **same amount of revenue as last year**

This rate takes into account the interaction between local taxes, state aid, and recapture.

M&O: \$0.76754
I&S: \$0.31488

\$1.08241

VOTER APPROVAL TAX RATE

The **maximum tax rate** that can be adopted **without triggering a VATRE**

In most cases, this is equal to the proposed/adopted tax rate.

M&O: \$0.7494
I&S: \$0.2700

\$1.0194

MAXIMUM TAX RATE

The voter approval tax rate plus **all available taxing authority**

Adopting this rate triggers a voter approval tax rate election (VATRE)

M&O: \$0.7810
I&S: \$0.2700
